SUMMARY

Front-end Developer with over 2 years of experience in building fast, accessible, and scalable web applications. I enjoy transforming design concepts into functional UI using modern frameworks while adhering to strong architectural principles. My focus is on addressing user needs through a user-centered approach and contributing to better engineering workflows. I strive to write clean, testable, and maintainable code. Currently, I'm expanding my knowledge in system design, state management, and real-time architectures, particularly in the context of financial platforms. I'm always eager to learn and grow in my field.

SKILLS

- HTML
- CSS & Sass
- Bootstrap & Tailwind
- JavaScript & TypeScript
- ReactJS & NextJS
- MUI
- Redux, MobX & Zustand
- Jest & Vitest
- Progressive Web App
- Git
- SOLID & Patterns
- REST & GraphQL

EXPERIENCE

◈ Mid-Level Front-End Developer — Dorfak Intelligent Systems (Tehran, Iran — Oct 2024 – Jul 2025)

- Built real-time stock market frontends using React, WebSockets and GraphQL
- Contributed to developing a high-performance PWA for financial analytics
- Architected interactive dashboards with live charts using scalable patterns
- Collaborated in Agile teams, ensuring seamless frontend-backend sync
- Enhanced user engagement and data responsiveness (35% increase) through performance optimization and real-time UI enhancements.

◈ Junior Front-End Developer — Kara Ideh (Tehran, Iran — Mar 2023 – Jun 2024)

- Delivered multiple responsive UIs across domains with a component-based approach
- Integrated RESTful APIs, enforced TypeScript consistency
- Focused on UI performance optimization (up to 30% improvement)
- Maintained code quality in cross-functional teams.

EDUCATION

◈ Bachelor of Electrical Engineering (Bu-Ali Sina University)
